The muck was solid and it took a lot of persuasion to loosen it and get petrol flowing again. The engine would run to about 2500 r/min, but as soon as full power was needed, it would die. With the GDI, it is possible that you have a pump in the tank as a booster as well as the high pressure pump at the engine.

Fuel Issues with Pajero NL 97 3500 V6 GDi - Pajero 4WD ...

The 6G7 series or Cyclone V6 engine is a series of V6 piston engines from Mitsubishi Motors. Five displacement variants have been produced from 1986 to present day, with both SOHC and DOHC, naturally aspirated and turbo charged layouts. While MIVEC variable valve timing has also been implemented in some versions the 2.5, 3.0 and 3.5 L versions were also available with gasoline direct injection.

3500 Gdi Engine - modapktown.com

GDI engines are not the only engines that get carbon deposits. Conventional fuel injected and carbureted engines can suffer from carbon buildup, too. CRC GDI valve and turbo cleaner is safe for use in engines with port fuel injection or carburetors. You can apply the product in the same way as you would on a GDI engine right through the air intake.
