INTRODUCTION The tropical root and tuber crops are comprised of crops covering several genera. They are staple foods in many parts of the tropics, being the source of most of the daily carbohydrate intake for large populations. These carbohydrates are mostly starches found in storage organs, which may be enlarged roots, corms, rhizomes, or tubers.

Tropical Root and Tuber Crops

Introduction. Rainforests nearest to the equator, where the climate is very hot and wet all through the year, are evergreen because the trees can grow all of the time and so are always in leaf. They are found in South and Central America, Central Africa, Indonesia, Malaysia and the north eastern tip of Australia.

Jane Richardson "An Introduction to Nutrition" is designed to teach students how to apply concepts of nutrition to their lives. They will become familiar with the elements of the Food Pyramid and how to interpret it.

An Introduction to Nutrition

Fresh apples, berries, haricot verts, leeks, mushrooms, various squash, and stone fruits are among the most commonly used products. Poultry, beef, lamb, and veal are readily available year-round; game meat is especially popular and abundant during the hunting season that runs from early autumn to February.
