Workbook protection is applied in a similar way to worksheet protection, but with fewer options. It prevents users from changing the structure of a workbook, such as creating or renaming worksheets. Click Review -> Protect workbook from the ribbon. The Protect Structure window opens. Enter a password, then click OK.

Crack Excel passwords with VBA - Excel Off The Grid
A version of the macro that skips previously imported events is here.A sample workbook is here.. Tip: If all appointments start and/or end at the same time, you can set a specific time value instead of getting it from the spreadsheet:

Create Appointments Using Spreadsheet Data
the 2nd workbook has the values and works great until the PM decided to put If formulas to figure out dates in the cells. So column 108 has this formula in it: =IF(DW8>0,DW8,IF(DJ8>0,DJ8+3,DI8+3)) but it displays the date 03/15/2010 becuase of this fomula we cannot get the vlookup to populate the 03/15/2010 on the first workbook cell.
