Passive solar heating. Passive solar heating is the least expensive way to heat your home. Put simply, design for passive solar heating keeps out summer sun and lets in winter sun while ensuring that the building envelope keeps that heat inside in winter and allows any built up heat to escape in summer.

The relevant formula is  $V=IR$ , the definition of resistance. If  $V$  is the drop in electric potential over the entire circuit, and  $R$  is the resistance over the entire circuit, the current ( $I$ ) through any point of the circuit can be increased by an increase in the applied voltage.

Pulleys have been used for centuries in the workplace to make lifting easier. Typically made with a rope and a wheel, a pulley allows a person to lift a heavy load without using as much force as would normally be needed. The term pulley is often used interchangeably with the word sheave, but this is not technically
