Inquiry-based learning (also spelled as enquiry-based learning in British English) is a form of active learning that starts by posing questions, problems or scenarios. It contrasts with traditional education, which generally relies on the teacher presenting facts and their own knowledge about the subject. Inquiry-based learning is often assisted by a facilitator rather than a lecturer.

### Inquiry-based learning - Wikipedia

Students with a score of 4 or 5 on the AP Biology test who complete the first three quarters of the Advanced Biology Fundamentals Sequence will be awarded three credits toward the Biological Sciences major and credit for completing the general education requirement in the biological sciences. This option is especially appropriate for students who plan to major in Biological Sciences or prepare ...

Inquiry-based learning (also enquiry-based learning in British English) starts by posing questions, problems or scenarios—rather than simply presenting established facts or portraying a smooth path to knowledge. The process is often assisted by a facilitator. Inquirers will identify and research issues and questions to develop their knowledge or solutions.

The history of the discovery of the structure of DNA is a classic example of the elements of the scientific method: in 1950 it was known that genetic inheritance had a mathematical description, starting with the studies of Gregor Mendel, and that DNA contained genetic information (Oswald Avery's transforming principle). But the mechanism of storing genetic information (i.e., genes) in DNA was ...
