~::~r~/ .. 51040 CARBURET ION The Zenith Stromberg carburetor is a constant velocity variable choke (venturi) carburetor. The variable choke (Venturi) allo~s an increase or decrease in choke (v~nturi) size depending upon throttle plate position. This variation of choke (venturi) size maintains a constant air velocity over the jet hence allowing a constant depression over the fuel supply at any ...

### Zenith Stromberg Factory Tuning Manual

The accelerating pump of the Stromberg PS carburetor is a spring-loaded diaphragm assembly located in the metered fuel channel. A manual mixture control provides a means of correcting for enrichment at altitude. Needle valve can be adjusted to bleed off the venturi suction to maintain the correct fuel/air ratio as the aircraft gains altitude.
