Make a note of what colors you use and in what proportions at the bottom of the scale (or on the back when the paint has dried). With practice, this color-mixing information will become instinctive. Knowing how to mix the range of skin tones means you can concentrate on painting, rather than interrupting your painting to mix the right tone.

## **Painting Skin Tones - The Spruce Crafts**

The scale of a model is expressed either as a ratio e.g. 1:35 or more commonly as a fraction e.g. 1/35th and indicates the size of the model compared to the original object that it is replicating. For example a 1/100th (1:100) scale tank has dimensions exactly 100 times smaller than the original.
