Example 3: Introducing Operator. Now we'll see another example by introducing an operator to transform the emitted data. In the below example filter() operator is used to filter out the emitted data.. filter() operator filters the data by applying a conditional statement. The data which meets the condition will be emitted and the remaining will be ignored.

7) Memorandum and Post Dated Vouchers in Tally. Memorandum Vouchers are used when you are NOT sure about the transaction as well as not sure about the amount of the transaction.. Post Dated Vouchers are used to create vouchers for future dates.For example, Post Dated Cheques. You can even use BOTH Memorandum and Post Dated Vouchers at the same time. I have explained that in the video and post too.
