Chickens don't only provide a constant supply of fresh eggs—they produce an endless amount of manure, too. Luckily, chicken poo can be composted, aged, and eventually added to the garden. In

about 6 months' time, you will accumulate about 1 cubic foot of manure per chicken.

Raising Chickens 101: A Beginner's Guide to Chickens | The ...

Battery cages are a housing system used for various animal production methods, but primarily for egg-laying hens. The name arises from the arrangement of rows and columns of identical cages connected together, in a unit, as in an artillery battery. Although the term is usually applied to poultry farming, similar cage systems are used for other animals.

Battery cage - Wikipedia

Bantam Cochin Chickens. In total, the American Bantam Association lists over 400 varieties of bantam birds.. The origin of the word 'bantam' is from the seaport of Bantan, Indonesia.. When sailors stopped into the port for fresh food and water supplies, they were impressed by the local chickens, which were smaller than the chickens back home.
