Trauma occurring during childhood or adolescence can have a substantial impact on adolescent development. The resources in this section provide professionals with the tools to understand the impact of trauma on adolescents, as well as examples of approaches to working with youth who have experienced traumatic events.

Child And

Adolescent

Childhood KEY

LEARNING POINTS •

There is no universal definition of who is a child, adolescent or youth. Chronological age is not a sufficient criterion for establishing operational definitions.

Development - WHO

Adolescence is a period of life with specific health and developmental needs and rights. It is also a time to develop knowledge and skills, learn to manage emotions and relationships, and acquire attributes and abilities that will be important for enjoying the adolescent years and assuming adult roles.
