The structure of the skull is a highly detailed and complex design. In all, there are 22 bones comprising the entire skull, excluding the 3 pairs of ossicles located in the inner ear. The bones of the skull are highly irregular. Most of the bones of the skull are held together by firm, immovable fibrous joints called sutures or synarthroses. These joints allow the developing skull to grow both ...

The nail consists of the nail plate, the nail matrix and the nail bed below it, and the grooves surrounding it. Parts of the nail. The matrix, sometimes called the matrix unguis, teratogenous membrane, nail matrix, or onychostroma, is the tissue (or germinal matrix) which the nail protects. It is the part of the nail bed that is beneath the nail and contains nerves, lymph and blood vessels.
