A tropical cyclone is a rapidly rotating storm system characterized by a low-pressure center, a closed low-level atmospheric circulation, strong winds, and a spiral arrangement of thunderstorms that produce heavy rain and/or squalls.Depending on its location and strength, a tropical cyclone is referred to by different names, including hurricane (*/ ˈ h ʌ r ɪ k ə n , - k eɪ n /*), typhoon (*/ t ...*

Tropical cyclone - Wikipedia

The ratio scale is an interval scale with a meaningful absolute zero, or a point at which there is an absence of the variable measured. Whereas an interval scale describes differences between scale values in scale points, a ratio scale can compare values by ratios. A simple example is time, where 1 hour is equivalent to 2/3 hours + 1/3 hours.

Rationale for treating suicidal states with CBT. A developmentally sensitive cognitive-behavioral model of adolescent suicidal behavior 2 adapted from an adult model of suicidality 3 postulates that suicide attempts emerge from reciprocity among maladaptive cognition, behavior, and affective responses to stressors. This model posits that there is a predisposing vulnerability among youth who ...

Remark 3.3. Barron's approximation bounds were on \mathcal{F}_C , and in particular the number of nodes needed scaled with C/ϵ^2 , where ϵ is the target accuracy. As we will see later, since threshold units are (kindof) the derivatives of ReLUs, then the Barron norm can also be used for complexity estimates of shallow networks ...
