This is a lab manual for a college-level human anatomy course. Mastery of anatomy requires a fair amount of memorization and recall skills. The activities in this manual encourage students to engage with new vocabulary in many ways, including grouping key terms, matching terms to structures, recalling definitions, and written exercises. Most of the activities in this manual utilize anatomical ...

Observing Mitosis with Fluorescence Microscopy - Mitosis, a phenomenon observed in all higher eukaryotes, is the mechanism that allows the nuclei of cells to split and provide each daughter cell with a complete set of chromosomes during cellular division. This, coupled with cytokinesis (division of the cytoplasm), occurs in all multicellular plants and animals to permit growth of the organism.

A concave mirror can be thought of as a slice of a sphere. The line passing through the center of the sphere and attaching to the mirror is known as the principal axis. The point in the center of the sphere is the center of curvature. The point on the mirror's surface where the principal axis meets the mirror is known as the vertex. Midway between the vertex and the center of curvature is a ...
