Intelligence analysis is the application of individual and collective cognitive methods to weigh data and test hypotheses within a secret socio-cultural context. The descriptions are drawn from what may only be available in the form of deliberately deceptive information; the analyst must correlate the similarities among deceptions and extract a common truth.

intelligence, charisma and being consistent and clear. Authentic leadership Recent corporate, financial and governmental scandals and misconduct have also led to a growing interest in the related idea of authentic leadership. This focuses on being genuine, honest and trustworthy in your leadership style.

Understanding Leadership Styles

The IMF predicted the growth rate of India in the financial year of 2020-21 as 1.9%, but in the following financial year, they predict it to be 7.4%. IMF also predicted that India and China are the only two major economies that will maintain positive growth rates. However the prediction later turned out to be wrong. [citation needed]
