High Probability Trading would be the closest thing to a forex holy grail, right? Maybe not. But what is high probability trading and what does it involve? Are there any high probability forex trading strategies around?. Well, let see, shall we? But before you go any further, you need to understand what high probability trading is.

High Probability Trading Forex (AND 2 THINGS YOU NEED TO KNOW)

In trading the probability of a successful trade is normally between 40%-60%. It depends on different market conditions and timing or trades. We can be successful with 40% of our trades and make lots of money as long as we manage them correctly. We can take successful trades 80% of the time and still lose money if we manage our trades poorly.

The law of probability in trading - trading secrets

For continuation patterns, stops are usually placed above or below the actual chart formation. For example, when trading a bearish rectangle, place your stop a few pips above the top or resistance of the rectangle. Bilateral Chart Patterns. Bilateral chart patterns are a bit more tricky because these signal that the price can move EITHER way. Huh?
