Dawn is a retired space probe that was launched by NASA in September 2007 with the mission of studying two of the three known protoplanets of the asteroid belt: Vesta and Ceres. In the fulfillment of that mission—the ninth in NASA's Discovery Program—Dawn entered orbit around Vesta on July 16, 2011, and completed a 14-month survey mission before leaving for Ceres in late 2012.

Dawn (spacecraft) - Wikipedia

Satellites were still a new "space-age" thing at the time, so the paperweight was a symbol of General Electric's advanced technology. 5 The beeps from the paperweight are similar to those produced by Sputnik (1957). At the time, the paperweight must have been an impressive object, a vision of the future. ...

Introduction. The recent rise in prevalence of type 2 diabetes is concomitant with the sharp rise in obesity in the United States and other developed countries. 1,2 Changes in body composition that accompany the onset and progression of obesity have a dramatic impact on metabolism and insulin sensitivity. Adipose tissue is postulated to be a key factor in regulating whole body lipid flux, thus ...
