Elliptic geometry is an example of a geometry in which Euclid's parallel postulate does not hold. Instead, as in spherical geometry, there are no parallel lines since any two lines must intersect. However, unlike in spherical geometry, two lines are usually assumed to intersect at a single point (rather than two).

Elliptic geometry - Wikipedia

Students of our MCAT Crash Course, MCAT University and Home Study MCAT Course will also have access to a 2-month, 4-month and 6-month study schedules through their member's dashboard, respectively. The following are key principles behind the Gold Standard MCAT study schedule:

MCAT Study Schedule | Study Plans for 2 and 3 Months

Using the two numbers of the coordinate geometry, a location of any point on the plane can be found. Let us know more! A coordinate geometry is a branch of geometry where the position of the points on the plane is defined with the help of an ordered pair of numbers also known as coordinates. Suggested Videos
