Creating a catalog file will take quite some time. Luckily you only need to create catalog file once. It will be created in same folder where install.wim file used to create it is located, in this example case now in my D:\ISO_Files\Sources folder. The filename will be install_Windows 10 XXX.clg where XXX is edition in question. Copy the catalog file to another folder to keep it for future needs:

Create media for automated unattended install of Windows ...

Ensure that you use the straight apostrophe in the expression, not some accent or typographic single quote. Then save the file by C-x C-s, close Emacs with C-x C-c, and the setup is completed. The installation was successful, if when opening a .tex file in the menu bar new entries "Preview", "LaTeX" and "Ref" appear.. If you want faster and smaller preview images, you have to get ...
