### Hodgdon Reloading Manual 2012

Three Powder Reloading Manuals in One Reload Data from THREE powder companies is included in this one reloading manual; Hodgdon, IMR, and Winchester Smokeless Propellants. Data is listed for most popular Rifle, Pistol, and Shotgun cartridges. For the most comprehensive up to date reload data, including the most recent new caliber ...

### Basic Reloading Manual - PBC

John Haviland / Wolfe Publishing Co. 4/1/2012 The .357 Magnum is a useful and fun cartridge when fired from a revolver. Shot from the longer barrel of a rifle, though, the .357 shows a pronounced improvement in velocity and trajectory.

### Load Data | The Best Reloading Manual Online

The revelation to me is the problem of grossly non-linear pressure increase with powder loads beyond reloading manual maximum or even when using data for the wrong bullet. I'll still keep H335 as my mainstay, first pick, for most cartridges, but I will follow bullet reloading manuals more carefully and never exceed maximums shown there.

### Hodgdon H335 Warning | The Firearms Forum

HS-6 is one of the 3 powders I use most. HS-6 is the same exact powder as the now discontinued W540. It's an older hard to ignite ball powder and it performs best at the upper end of the pressure range and when set off by a magnum primer.

### Hodgdon HS 6 - Smith & Wesson Forum

Looking at getting the Lyman Cast bullet manual. All are good with updated info on newer powders and cartridges. As a bonus, when I purchased the Hornady manual, there was a postcard size insert with a QR code, download their app and scan the code for a free year of the manual in the app.

### Shopping for new reloading manual | The Firearms Forum

A good load manual or 2 or 3 is a necessity and you should never trust load data given to you on the Internet from an unknown source. All of the powder manufacturers provides load data for their powders. Hodgdon for Hodgdon, IMR and Winchester powders. Alliant site. Accurate Arms site. Ramshot site. VihtaVuori load data.

### reload data for hodgdon H110 Powder | The High Road

Hodgdon's published load data from the .45 ACP, 10mm and .38 Super were from 5" barrels, while their published data for .40 S&W and 9mm data were from 4-inch barrels. The .38 Special was tested in a Smith & Wesson Model 66 with a 2.5-inch barrel. Hodgdon's published data was from a 7.7-inch barrel.

### A 'Fast' Look at Hodgdon CFE Pistol Powder - Shooting Times

Hodgdon doesn't make any powder but they do put their name on H-110 and Lil'Gun plus they distribute W-296 so I would have to believe them. Another good resource is the Hornady reloading manual where all loads are listed in order of burn rate.

All you have to do is look at the recommended Load Data from Hornady and Hodgdon. Both sources for load data that are considered trustworthy and responsible. So, explain why, for the 158 grain Hornady XTP that Hornady recommends a load range of 12.7 to 15.6 grains and Hodgdon starts at 15.0 grains and goes to 16.7 grains.

### Reloading Data for caliber 9mm - The Best Reloading Manual ...

Great, thanks folks. I am quite familiar with the online data available from powder manufacturers (esp. Hodgdon). I was just hoping that say, Hornady, had a digital version of their manual I could keep on a tablet for use at the bench.

### Digital reloading manuals? | The High Road

The Hodgdon data says 869 is the velocity king of their powders for 300 PRC heavy bullets so I got some 869 to try too (and also Ramshot LRT and even 8lbs of Shooters World 50 BMG, which won't be the velocity king, according to Quickload).

Shown above, a .45 Colt, .454 Casull and the .460 S&W Magnum (HP = Hollow Point, RN = Round Nose, FMC = Full Metal Case, FMJ = Full Metal Jacket, JHP = Jacketed Hollow Point and if GC indicated, means Gas Check at bottom of lead bullet) Loads for 454 Casull: 4-1-2012 update The .454 came out in the late 50's and was the big, bad boy in town, till the advent of the .500 S&W mag and now, the ...

### Reloading The 454 Casull - Reload Ammo

About the only affordable way for the average guy to support a steady clay target shooting hobby is to reload. This is especially the case with sub-gauge loads. I started reloading shotshells primarily because I shoot 28 gauge and .410 competitions in skeet, and paying more than \$10 a box for factory loads can make even a good day of shooting feel bad. However, reloading isn't just for target ...

### **16 Gauge reloading data | Trapshooters Forum**

I learned to reference more than one source the hard way. I got some load data for 40 grain bullets using Varget in .22-250 from a printed softcover manual from a well-known reloading equipment company. I loaded a few up and touched one off. The minimum load was hot enough that I couldn't get the bolt open.

### **Reloading The .45 ACP (Automatic Colt Pistol) - Reload Ammo**

Hodgdon's listing of 18.0 grains of CFE BLK as maximum for 30- and 35-grain bullets needs clarification. The S.A.A.M.I. maximum average pressure for the 218 Bee is 40,000 CUP. Pressures generated in Hodgdon's pressure barrel for an 18.0-grain charge behind those two bullet weights was only 33,500 and 35,700 CUP respectively.
