### CT110 Side cover (Left) how to remove? - Honda Trail ...

Remove the foot peg bracket and the kick starter pedal from its shaft. If the original right side engine case bolts are present, you will need an impact wrench with a #3 Phillips head and a hammer to remove the bolts. Set the impact wrench to "loosen", turning COUNTER CLOCK WISE (anti-clock wise), when it is struck with the hammer.

The Honda CT110 is a small dual-sport motorcycle made by Honda in Japan since 1980 and is sold in various parts of the world. The bike has sold well worldwide. The CT110 replaced the CT90, which was essentially the same machine but with a smaller displacement engine.. Design

### Honda CT110 - Wikipedia

Except for the engine change, the 1966 models of CT200 and CT90 were the same—the change in model number reflected a new Honda policy that model numbers would indicate engine-size class. The CT200 and 1966 CT90 had a dual rear sprocket, which created a lower gear range for heavy weight or steep terrain.
