Mining is the extraction of valuable minerals or other geological materials from the Earth, usually from an ore body, lode, vein, seam, reef, or placer deposit. These deposits form a mineralized commodity that is of economic interest to the miner. Ores recovered by mining include metals, coal, oil shale, gemstones, limestone, chalk, dimension stone, rock salt, potash, gravel, and clay.

Mining - Wikipedia

Origami is a years-old practice that many of us did as children—learning how to create folded paper boxes and cranes. But there's much more to this craft than a child's past time. This artistic tradition is being used by contemporary artists who are continually pushing the boundaries of what's possible with paper.
