Disaster is a laboratory for innovation. During a war, or in the aftermath of an earthquake, whole societies mobilize to answer the immediate challenge, while a cadre of researchers looks for a way to transform the crisis into advances that will improve lives, or save lives, in the future.

The pandemic could open a door to new technology — and ...

Each decision made in a society to embrace complexity—whether that involved the establishment of kinship rules or food technology—occurred in its own peculiar, and likely largely unplanned, way. The evolution of societies is like human evolution, not linear but branched, messy, full of dead ends and successes not necessarily marked by the ...
