Course Catalog - Harvard Graduate School of Design

Knowing how landscape structure affects the provision of ecosystem services (ES) is an important first step toward better landscape planning. Because landscape structure is often heterogenous across space, modelling the relationship between landscape structure and the provision of ES must account for spatial non-stationarity.

Quantifying spatial non-stationarity in the relationship ...

Principles of Sustainable Tourism. Tourism Concern, 1991 in association with the Worldwide Fund for Nature(WWF) gives 10 principles for sustainable tourism. These are following as: 1) Using resources sustainably. The conservation and sustainable use of resources- natural, social and cultural - is crucial and makes long-term business sense.
