No idea why this has come alive again - but have a look at early/late binding. If you add a reference (either by hand or programmatically) it ties your code to a specific version. e.g. Excel 11 library is tied to Excel 2003. All good if that's what you want, but quite often (especially where I work) I need it to work on 2003, 2007 and 2010.

excel - How to add a reference programmatically - Stack ...
WordMat Excel sheet not working as expected if you save one of the Excel sheets you have to make sure it is saved as an Excel sheet with macros (You will be warned if you try to save it as a regular Excel document, but can easily be overlooked). If you save the Excel sheet as a regular Excel document a lot of the active parts are deleted.
