The oil temperature is a vital part to keeping your engine running smoothly. The oil temperature should be a few degrees warmer than the coolant. If the oil temperature is too high, problems can arise. When you first start your vehicle on cold mornings, let the car idle for about five minutes until the oil gets a chance to warm up.

Symptoms of a Bad or Failing Oil Temperature Sensor ...

Hi Everyone My 2007 Grand Cherokee 5.7 indicates "Transmission over temp" It happened just after it was serviced and got new transmission oil. The oil level is correct and the transmission works fine. It also came on while the car idle and not even moving. The computer was reset and cleared of any fault codes but it comes on.

P0713 Jeep - WHERE IS LOCATED A/T FLUID TEMP SENSOR?

Most older Jeep Grand Cherokee engines (4.0L), call for 10W-30 oil for most driving and weather conditions. This is usually an acceptable oil, however, as Cherokee engines begin to wear, oil has the tendency of thinning considerably. Some Grand Cherokee drivers have attempted to remedy this common problem by using heavier oil.
