Farmer-managed  
natural regeneration  
(FMNR) is a low-cost,  
sustainable land  
restoration technique  
used to combat  
poverty and hunger  
amongst poor  
subsistence farmers in  
developing countries  
by increasing food and  
timber production, and  
resilience to climate  
extremes. It involves

Journal.

## **Ancient Trees - Woodland Trust**

The word forest derives

# Read Free Parkland

from the Old French forest (also forès), denoting "forest, vast expanse covered by trees"; forest was first introduced into English as the word denoting wild land set aside for hunting without the necessity in definition of having trees on the land. Possibly a borrowing, probably via Frankish or Old High German, of the Medieval Latin foresta, denoting "open wood
