**Youth Pediatric Symptom Checklist- 17 - Project Teach**  
BACKGROUND: The Pediatric Symptom Checklist-17 (PSC-17) is a widely used, briefer version of the PSC-35, a parent-completed measure of children's psychosocial functioning. Despite the extensive use of the PSC-17 over the past 15 years there has not been a large-scale replication of the original derivation study. OBJECTIVE: To examine the prevalence of positive screens, reliability, and ...

Pediatric Symptom Checklist-17 (PSC-17) INSTRUCTIONS: Emotional and physical health go together in children. Because caregivers are often the first to notice a problem with their child's behavior, emotions or learning, you may help your child get the best care possible by answering these questions. Please mark under the

**Pediatric Symptom Checklist-17 (PSC-17)**  
The Pediatric Symptom Checklist (PSC) helps pediatricians and pediatric nurse practitioners improve the recognition of psychosocial problems in their patients. The PSC is designed to fit into the workflow of a primary care practice and can be used to alert families of psychosocial and emotional issues.
