Tides result from a gravitational tug-of-war between Earth, the Moon, and the Sun. The Moon's gravitational force is slightly stronger on the side of Earth that is closer to the Moon than it is on the side of Earth that is farther from the Moon. This small difference in the strength of the Moon's gravitational force pulls Earth's oceans into an elliptical shape.

The Moon and Tides | Science Project

I did a paper in 1990 and proved that the full moon has a higher affect on human behavior it has to do with the tuger pressure on the fontanel lobe of the brain causing people with emotional disorders to act out yes I proved using data from Dade county Florida and Cleveland Ohio that there is an increase in violent crimes murder suicide and rape . your data needs to be time of crime not ...
