A stock derivative is any financial instrument for which the underlying asset is the price of an equity. Futures and options are the main types of derivatives on stocks. The underlying security may be a stock index or an individual firm's stock, e.g. single-stock futures.. Stock futures are contracts where the buyer is long, i.e., takes on the obligation to buy on the contract maturity date ...

Stock - Wikipedia

In other words, if you sell a stock for a loss, then buy the same stock a week later, your loss will no longer give you tax benefits. The loss will be accounted for once you sell the stock again. If minimizing your tax bill is a primary concern, consider a retirement account like a Roth IRA or 401(k) plan instead of a standard brokerage account.
