## Read Free Tactical Display For Soldiers Human Factors Considerations

In providing soldiers with a common perception of the battlefield or other common contextual framework, the helmet-mounted display will facilitate actions that are based on responding to data or taking action based on data. The extent to which it will speed thinking and acting when the soldier has to create data is not so evident.

The display in the Land Warrior System is initially to be an opaque screen, with a 40 degree field of view displayed on a monochrome 640 x 480 active matrix electro luminescence (AMEL) display, positioned about 1 inch from the wearer's eye. The display is monocular, leaving one eye available to view the ambient environment.
