to the early agriculturalist, and rapidly fixed within their germplasm. It has also been shown by several researchers that many of these domestication traits are clustered near each other on the chromosome, and so are often closely linked (Cai and Morishima, 2002; Khavkin and Coe, 1997; Koinange et al., 1996; Poncet et al., 2000

Since ancient times, evidence from tomb paintings, artifacts, and texts reveals that people at all levels of society kept dogs as loved pets and members of the family. The dog is the oldest domestic animal (one whose care, feeding, and breeding is under human control), living with humans for approximately 10,000 years. (Messent and
