WHY MIGRATION AND CITIES?

MIGRATION – URBAN PHENOMENON

WHAT IS INTERNATIONALISATION?

The desire of cities to attract and retain international population (investors, visitors, traders, immigrants...), capital and investments in order to achieve sustainable development.

INTERNATIONALISATION

CLARK, Greg

Towards OpenCities

http://opencities.britishcouncil.org/web/download/conference/towards_opencities.pdf

TWO KEY FACTS:

- Cities do not have control over immigration rules and systems, which are the preserve of national governments;
- Not all cities are equally attractive to international populations, some cities appear to internationalise their populations quicker than others, even within the same national systems.

SOME FACTS:

- In 2007 more than half of the world's population lives in urban areas (UNPF)
- Cities and urban areas are increasing in number and in size
- Europe is not growing from natural increase, almost all the growth is coming from immigration

TRENDS IN INTERNATIONAL MIGRATION

- Globalization Of Migration
- Acceleration Of Migration
- Differentiation Of Migration
- Feminization Of Migration
- Growing Politicization Of Migration
- Proliferation Of Migration
