School of Veterinary Medicine - Forms and Guidelines

This laboratory is not aware of any evidence to support the hypothesis that vaccination could be associated with the induction of immune mediated thyroid disease. In fact, some researchers have looked for and failed to find such an association (Hogenesch et al., 1999 Advances in Veterinary Medicine 41: 733-747).

Multidrug Sensitivity in Dogs and Cats. Multidrug sensitivity, a genetic predisposition to adverse reactions caused by commonly used drugs, can occur in up to 75% of some dog breeds (link to affected breeds) and affects 4% of all cats (link to publications). Thankfully, we have discovered the cause and invented a method (MDR1 test) to determine if a dog or cat has this condition.

Washington State University VCPL - MDR1 Test

Veterinary radiologists often work in veterinary clinics, consulting with other veterinarians on staff. They might also work in laboratory settings or for zoos where research is being done and care for animals is necessary. Some professionals may work in veterinary radiological clinics that partner with multiple veterinary offices.

Veterinary Radiologist Job Description: Salary, Skills, & More

Medicine is the science and practice of caring for a patient and managing the diagnosis, prognosis, prevention, treatment or palliation of their injury or disease. Medicine encompasses a variety of health care practices evolved to maintain and restore health by the prevention and treatment of illness. Contemporary medicine applies biomedical sciences, biomedical research, genetics, and medical ...

Medicine - Wikipedia

As a secondary interpretation, based on the abundance of Clostridium hiranonis, the assay can predict normal or abnormal conversion of bile acids in the intestine (i.e., predicts a lack of conversion of primary to secondary bile acids), as the lack of secondary BA is a major contributor to an abnormal microbiota.
